Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
  – *there may be more space than you need.*
- **Calculators may be used.**
- If your calculator does not have a π button, take the value of π to be 3.142 unless the question instructs otherwise.

Information

- The total mark for this paper is 100
- The marks for **each** question are shown in brackets
  – *use this as a guide as to how much time to spend on each question.*
- Questions labelled with an **asterisk** (*) are ones where the quality of your written communication will be assessed.

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

One of the 100 customers is chosen at random.

(a) What is the probability that this customer went to the shop 5 or more times?

Number of people who went 5 or more = 13+11+5

He wants to buy some cakes and some sausage rolls.

The cakes are sold in boxes.
There are 12 cakes in each box.
Each box of cakes costs £2.50

The sausage rolls are sold in packs.
There are 8 sausage rolls in each pack.
Each pack of sausage rolls costs £1.20

Ali wants to buy more than 60 cakes and more than 60 sausage rolls.
He wants to buy exactly the same number of cakes as sausage rolls.

What is the least amount of money Ali will have to pay?

Cakes   12   24   36   48   60   (72)   84   96   108

Sausages   8   16   24   32   40   48   56   64   (72)

Same amount of cakes & sausages = 72

- Cost of cakes = 2.50 × 6   (6 boxes).

Train ticket

NP = Normal price before increase

£225 = 112.5% of NP.

Weekly pay.

NP = Normal pay before increase

£535.50 = 105% of NP

535.50 = 1.05 × NP.
