Materials required for examination

Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Items included with question papers

Nil

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions. Write your answers in the spaces provided in this question paper.

You must NOT write on the formulae page.

Anything you write on the formulae page will gain NO credit.

If you need more space to complete your answer to any question, use additional answer sheets.

Information for Candidates

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 26 questions in this question paper. The total mark for this paper is 100.

There are 24 pages in this question paper. Any blank pages are indicated.

Calculators may be used.

If your calculator does not have a π button, take the value of π to be 3.142 unless the question instructs otherwise.

Advice to Candidates

Show all stages in any calculations.

Work steadily through the paper. Do not spend too long on one question.

If you cannot answer a question, leave it and attempt the next one.

Return at the end to those you have left out.

1. The equation

$$x^3 + 20x = 71$$

has a solution between 2 and 3

Use a trial and improvement method to find this solution.
Give your answer correct to one decimal place.
You must show **ALL** your working.

Leave
blank

$x = \dots\dots\dots$

(Total 4 marks)

Q1

<p>2. The equation</p> $x^3 - x = 30$ <p>has a solution between 3 and 4 Use a trial and improvement method to find this solution. Give your answer correct to 1 decimal place. You must show all your working.</p> <p style="text-align: right;">$x = \dots\dots\dots$ (Total 4 marks)</p>	Leave blank
	Q2 <input type="text"/>

	Leave blank
<p>4. The equation</p> $x^3 + 10x = 51$ <p>has a solution between 2 and 3 Use a trial and improvement method to find this solution. Give your answer correct to 1 decimal place. You must show all your working.</p> <p style="text-align: right;">$x = \dots\dots\dots$ (Total 4 marks)</p>	<p style="text-align: center;">Q4</p>

5. The equation

$$x^3 + 5x = 67$$

has a solution between 3 and 4

Use a trial and improvement method to find this solution.

Give your answer correct to one decimal place.

You must show **ALL** your working.

$$x = \dots\dots\dots$$

Q5**(Total 4 marks)**
